"To Open Minds, To Educate Intelligence, To Inform Decisions”

The International Academic Forum (IAFOR) provides new perspectives to the thought-leaders and decision-makers of today and tomorrow by offering constructive environments for dialogue and interchange at the intersections of nation, culture, and discipline. Headquartered in Japan, with offices in Nagoya and Kobe, IAFOR is an independent think tank committed to the deeper understanding of contemporary geo-political transformation, particularly in the Asia Pacific Region.

IAFOR is a registered non-profit organisation (General Association一般社団法人). The organisation’s commercial activities are operated by a mission-driven social enterprise that underwrites the organisation and funds non-profit and charitable activities.

THINK.IAFOR.ORG is IAFOR’s brand new online magazine, launched for 2016. THINK is an ambitious project conceived by academics, for academics, with the following objectives:

— To provide an international, far-reaching platform for the best research presented at IAFOR conferences

— To make original, high-quality, thought-provoking multimedia content freely accessible to a wide readership

— To facilitate the opportunity for academics to step outside of the traditional research publishing status quo – to get creative, explore different disciplines and to have their ideas heard, shared and discussed by a diverse, global audience

Content published on THINK spans a wide variety of disciplines and the format is varied, encompassing full research papers, long-form journalism, opinion pieces, creative writing, interviews, podcasts, video, photography and more. Current contributing authors include leading academics such as Professor A. Robert Lee, Professor Bill Ashcroft and Professor J.A.A. Stockwin.

Welcome to Kobe

Dear Colleagues,

Welcome to The Asian Conference on Education 2016 (ACE2016), The Asian Conference on Society, Education & Technology 2016 (ACSET2016) and The Asian Undergraduate Research Symposium 2016 (AURS2016). As in previous years, this core group of conferences in the IAFOR calendar will be held as part of the same event in the cosmopolitan city of Kobe.

Set in the industrial and cultural hub of the Kansai region, Kobe is a city with a colourful history that touches on the conference themes of social justice, educating for equality and using technology to transform systems and societies. From the reopening of its port to international trade in the nineteenth century and the European traders who started new lives here, to the rapid industrial development of the twentieth century, to the city’s spirited rebuild after the devastating Great Hanshin Earthquake of 1995, with the help of technology and industry Kobe has transformed itself, surviving periods of upheaval to mature into an economic and cultural centre with robust, diverse educational systems and a flourishing international scene.

We are pleased to welcome academics and practitioners presenting on a diverse range of topics relating to society, education and technology, and we encourage you to explore the challenges and opportunities for interdisciplinary engagement that these few days will offer.

On a sadder note, I am sorry to announce that the Chairman of IAFOR, the Reverend Professor Stuart D. B. Picken, passed away on Friday, 5 August, 2016. A man of great intellect and integrity, for the past seven years Stuart has been a wonderful colleague, an inspirational leader and a loyal friend.

I would like to thank the Conference Co-Chairs, Professor Michiko Nakano of Waseda University, Japan, Professor Keith W. Miller of The University of Missouri, USA, Professor Barbara Lockee of Virginia Tech, USA, and Professor Robert Logie of Osaka Gakuin University, Japan, as well as the many others who have given their time and expertise in preparation for this event. A special thanks also goes to Dr Bernard Montoneri, Spotlight Speaker and Editor of the IAFOR Journal of Education, for his ongoing contributions to IAFOR.

Lastly, my thanks to you all for making the journey to attend this IAFOR conference, and I hope you enjoy your time in the wonderful city of Kobe.

I look forward to meeting you all over the coming days, and to the stimulating discussions and exchange of knowledge that will take place in this international academic forum.

Warm regards,

Dr Joseph Haldane, PhD (London), FRSA, FRAS
President, IAFOR
The Reverend Professor Stuart D. B. Picken (1942-2016)

Cleric and Philosopher

It is with sadness that we inform our friends of IAFOR that the Chairman of the organisation, the late Reverend Professor Stuart D. B. Picken, passed away on Friday, 5 August, 2016.

Stuart Picken was born in Glasgow in 1942 and enjoyed an international reputation in philosophy, comparative religious and cultural studies, but it is as a scholar of Japan and Japanese thought for which he will be best remembered, and as one of the world’s foremost experts on Shinto.

Picken entered University of Glasgow, Scotland, aged 16 to study divinity and philosophy, and his studies culminated with a doctorate that looked at Christianity and the work of Kant. In 1966 he was ordained in the Church of Scotland, and began his career as a minister in Orkney.

However, his curiosity led him from isolated rural Scotland to the world’s largest city, and following a visit to Tokyo on a Rotary scholarship, Picken was appointed Professor of Philosophy at the International Christian University (ICU) in 1972. Here he turned his western theological and philosophical training to comparative religious and cultural studies of Japan, at a time when the country was emerging from the shadows of the Second World War.

His groundbreaking and controversial work on suicide in Japan made his name within the country, but it was his subsequent work on Shinto that influenced the rehabilitation of the religion at a time when it was dismissed in the west as pagan and primitive, or unjustly caricatured for its wartime associations.

As Japan emerged as an economic superpower in the 1970s and 1980s, and given his growing prominence as an academic, he was much in demand as part of a period where Japanese wanted to learn more about themselves as seen through the eyes of the West, and where Western businesses were eager to learn from the all-conquering Japanese model. By then fluent in Japanese, Picken served as a business consultant to such corporations and also served as a consultant to various businesses, including Jun Ashida Ltd., Mitsui Mining & Smelting Corp., Kobe Steel, and Japan Airlines. During this period he was active in the St Andrew Society, when he founded the Tokyo Highland Games, which is still an annual event.

The author of a dozen books and over 130 articles and papers, Picken was to stay at ICU for 25 years, where he was a popular lecturer and mentor to both Japanese and visiting scholars, serving tenures as Chairman of the Division of Humanities from 1981 to 1983, and as Director of Japanese Studies from 1995 to 1997, as well as concurrently founding Director of the Centre for Japanese Studies at the University of Stirling, Scotland from 1985 to 1988. A keen amateur footballer, whose devotion to Japan was rivalled only by that he felt for Glasgow Rangers, he continued to play into his fifties at ICU, encouraging many students to take up the sport.

He left ICU in 1997, and from then until 2004 was appointed the founding Dean of the Faculty of Foreign Languages and Asian Studies at Nagoya University of Commerce and Business, and the founding Dean of the Graduate School Division of Global Business Communication from 2002 to 2004.

Upon his retirement from his academic posts, he returned to Scotland to re-enter the ministry as minister of the linked charge of Ardoch with Blackford in 2005, yet he continued his academic and Japanese interests as the Chairman of the Japan Society of Scotland.

Whether in his research or teaching, Picken devoted much of his life to increasing understanding between his adopted country and the West, and in 2007 he was recognised with the Order of the Sacred Treasure, an imperial decoration for his pioneering research and outstanding contribution to the promotion of friendship and mutual understanding between Japan and the UK. He also served as the International Adviser to the High Priest of the Tsubaki Grand Shrine, one of Japan’s largest and oldest shrines.

From 2009 he was the founding Chairman of The International Academic Forum (IAFOR) where he was highly active in helping nurture and mentor a new generation of academics, and facilitating better intercultural and international awareness and understanding. In the years immediately preceding his illness, he continued to lecture throughout the world, in Europe, North America, Asia and the Middle East.

He is survived by his wife, Hong Wen, and children, Fiona, Jeannette, William and Lynn.
IAFOR promotes and facilitates new multifaceted approaches to one of the core issues of our time, namely globalisation and its many forms of growth and expansion. Awareness of how it cuts across the world of education, and its subsequent impact on societies, institutions and individuals, is a driving force in educational policies and practices across the globe. IAFOR’s Conferences on Education have these issues at their core. The conferences present those taking part with three unique dimensions of experience, encouraging interdisciplinary discussion, facilitating heightened intercultural awareness and promoting international exchange. In short, IAFOR’s Conferences on Education are about change, transformation and social justice. As IAFOR’s previous education conferences have shown, education has the power to transform and change whilst it is also continuously transformed and changed. The theme of education for social justice continues into 2016 in the Asian, European, Middle Eastern and North American Conferences on Education.

Globalised education systems are becoming increasingly socially, ethnically and culturally diverse. However, education is often defined through discourses embedded in Western paradigms as globalised education systems become increasingly determined by dominant knowledge economies. Policies, practices and ideologies of education help define and determine ways in which social justice is perceived and acted out. What counts as ‘education’ and as ‘knowledge’ can appear incontestable but is in fact both contestable and partial. Discourses of learning and teaching regulate and normalise gendered and classed, racialised and ethnicised understandings of what learning is and who counts as a learner.

In many educational settings and contexts throughout the world, there remains an assumption that teachers are the possessors of knowledge which is to be imparted to students, and that this happens in neutral, impartial and objective ways. However, learning is about making meaning, and learners can experience the same teaching in very different ways. Students (as well as teachers) are part of complex social, cultural, political, ideological and personal circumstances, and current experiences of learning will depend in part on previous ones, as well as on age, gender, social class, culture, ethnicity, varying abilities and more.

IAFOR has five annual education conferences, exploring common themes in different ways to develop a shared research agenda which develops interdisciplinary discussion, heightens intercultural awareness and promotes international exchange.

Sub-themes:

– Educating through borders of power
– Transcending boundaries of ‘self’ and ‘other’
– Challenging and transcending learning spaces
– Education and the boundaries of communication
– Borderlands of being and becoming

THE INTERNATIONAL ACADEMIC FORUM
Getting to the Conference Venue
The Art Center Kobe is conveniently located just a five-minute walk from Shin-Kobe Station.

From Kansai International Airport
Board the Kobe-bound Airport Limousine Bus from bus stop number 6 on the first floor of Kansai International Airport. Get off at Sannomiya Station (see below).

By Bullet Train (Shinkansen)
The Art Center Kobe is a five-minute walk from the first-floor exit of Shin-Kobe Station. There are regular bullet train (Shinkansen) services from Osaka (15 minutes), Kyoto (30 minutes), Tokyo (2 hours 48 minutes) and Hiroshima (1 hour 13 minutes).

From Sannomiya Station (Kobe Downtown Area)
The bustling downtown center of Sannomiya, with a huge range of restaurants, bars, cafes and shops, is a 15-minute walk, or a short direct subway ride away. The express train from Osaka Station to Sannomiya takes 21 minutes. There are three options.
1) Take the subway to Shin-Kobe Station (Seishin-Yamate Line)
2) Take a taxi to the Art Center Kobe (about five minutes and approximately 800 JPY)
3) Walk to the Art Center Kobe (about 15 minutes)

Around the Conference Venue
The Art Center Kobe is a large, modern events center overlooking the city, and is opposite the ANA Crowne Plaza, the official conference hotel.

Kobe Geijutsu Senta, Kumochi-Bashi-Dori 7-13-11, Chuo-Ku, Kobe City

What to Wear & Bring

Attendees generally wear business casual attire. You may wish to bring a light jacket or sweater as meeting rooms are air conditioned. Tour attendees are encouraged to wear comfortable shoes and bring an umbrella or waterproof in case of rain.

Smoking

Smoking is not permitted in the Art Center Kobe. Please smoke outside of the building in designated smoking areas.

Printing & Computer Access

For your convenience, there will be an iMac computer (with Microsoft Office installed) and a printer at the conference Registration Desk. We are able to offer a complimentary printing service of up to ten A4 sheets should you need this. Please be advised that printing may not be available at peak times.

Business Center

The Crowne Plaza operates a business center for copying, printing, and scanning. This business center is staffed and open between 09:00 and 17:00 daily.

Internet Access

There will be a free WiFi internet connection on the fifth floor of Art Center Kobe. However, this can be unreliable and we would strongly suggest that you do not rely on a live connection for your presentation.

WiFi Connection Name: kobe-art  Password: art12345

Badges

When you check in, you will receive a registration pack, which includes your name badge. Wearing your badge is required for entrance to the sessions. You must wear your badge at all times during the conference. There are four colours of badges indicating the type of conference participant:

- **Red:** Presenters and General Audience
- **Yellow:** Keynote and Featured Speakers
- **Blue:** Conference Exhibitors and Affiliates
- **Black:** IAFOR Staff & Board Members

Photo/Recording Waiver

There will be photography, audio and video recording at the conference. By entering the event premises you give consent to the use of your photograph, likeness or video or audio recording in whole or in part without restriction or limitation for any educational, promotional, or other purpose for distribution.

Eating & Drinking

Food and drink (excluding water) are not allowed in the presentation rooms. Also, please refrain from consuming food and drink in and around the 2F entrance area.

Refreshment Breaks

Complimentary coffee, tea, and water will be available during the scheduled coffee breaks at the Plenary Session on Friday morning on the 2F, and in Room 504 (5F) during the rest of the conference. Light snacks will also be provided.

Official Conference Dinner

The official Conference Dinner is a ticketed optional event (5,000 JPY). If you have booked a place at the dinner you will receive a dinner ticket when you collect your name badge. Specifying your menu order. Please remember to bring your dinner ticket to the Conference Dinner. Conference Dinner attendees should meet in the Art Center Kobe 2F Lobby at 19:00 on Friday, October 21, 2016. From here, IAFOR staff will lead the 15-minute walk to the restaurant.

Restaurant name: Hatagoya (はたごや)
Restaurant address: Kumoibori 4-2-13, Chuo Ward, Kobe
Conference Abstracts

All conference abstracts are available online. Please visit papers.iafor.org for a searchable database of abstracts. Alternatively, download the IAFOR Events application, free of charge, from appstore.com/iaforevents on iPad or iPhone, or from the Google Play store for Android users.

Oral Presentations & Workshop Presentations

Oral Presentation Sessions will run from 14:00 on Friday afternoon, and from 09:00 on Saturday morning. They are generally organised into parallel sessions by streams. Oral Presentations are normally scheduled in sessions comprising three presentations, lasting 90 minutes in total. In sessions with two Oral Presentations, the session will last 60 minutes, and in the case of four Oral Presentations, an extended session lasting 120 minutes will be scheduled.

How long can my presentation be?

The time in the sessions is to be divided equally between presentations. We recommend that an oral presentation should last 15-20 minutes to include time for question and answers, but should last no longer than 25 minutes.

Presentations & Equipment

All rooms will be equipped with a MacBook computer pre-installed with PowerPoint and Keynote and connected to a LCD projector. If you wish, you may directly link your own PC laptop, although we advise you to use the computer provided by plugging in your USB flash drive. We recommend that you bring two copies of your presentation in the case that one fails, and suggest sending yourself the presentation by email as a third and final precaution.

Session Chairs

Session Chairs are encouraged to introduce themselves and other speakers (briefly) using the provided print-outs of speaker bios, hand out the provided presentation certificates at the end of the session, ensure that the session begins and ends on time, and that the time is divided fairly between the presentations. Each presenter should have no more than 25 minutes in which to present his or her paper, and respond to any questions. Please follow the order in the programme, and if for any reason a presenter fails to show, please keep to the original timeslots as delegates use the programme to plan their attendance.

The Session Chair is asked to assume this timekeeping role, and to this end, a yellow and red timekeeping card is used as a visual cue for presenters, letting them know when they have five minutes remaining, and when they must stop.

Presentation Certificates

Poster Presenters can pick up a certificate of presentation from the Registration Desk. All other presenters will receive a certificate of presentation from their Session Chair or a member of staff at the end of their session.

A Polite Request to All Participants

Participants are requested to arrive in a timely fashion for all presentations, whether to their own, or to those of other presenters. Presenters are reminded that the time slots should be divided fairly and equally between the number of presentations, and that they should not overrun. Please refrain from discussion until after presentations have ended and ensure that mobile phones are switched off or on silent during presentations.

Poster Sessions

Poster Sessions will run on Friday and Saturday. Sessions are 60 minutes in length and will be held in Room 504 (SF).

Poster Requirements

The poster display boards are 1,800 mm high x 900 mm wide and pins and tape will be provided for putting posters up. Please be aware that there are no on-site facilities for printing posters.

Conference Proceedings

The Conference Proceedings are published on the IAFOR website (www.iafor.org), and can be freely accessed as part of the research archive. All authors may have their full paper published in the online Conference Proceedings. Full text submission is due before November 23, 2016 through the online system. The proceedings will be published on December 23, 2016. Authors will have PDF copies of their offprints emailed to them by the IAFOR office by January 23, 2017.
Lunch
Lunch on Friday, Saturday and Sunday is included in the conference registration fee. Your IAFOR lunch voucher can be exchanged for lunch at either Mame no Hatake or Kineya Udon restaurant located in the ANA Crowne Plaza, a five-minute walk away from the conference venue. Please see the map below for directions. Please collect your lunch voucher from the IAFOR staff member situated outside the restaurants at the ANA Crowne Plaza between 11:30-14:00. Please remember to bring your conference name badge as you will need to show this in order to claim your voucher. Please show your voucher to restaurant staff as you enter. Last entry to the restaurant will be at 14:00.

Mame no Hatake (豆乃畑), 2F

Find out more about the IAFOR Journal of Education at the IAFOR Journal Information Session, held on Friday, October 21.

In this brief informational talk Dr Bernard Montoneri, Editor of the IAFOR Journal of Education, will introduce the journal and offer advice on writing academic papers, with specific focus on how to develop a paper to the standard expected for submission to and publication in a scholarly journal. In addition, Dr Montoneri will discuss the requirements for membership of the IAFOR Journal of Education Editorial Board, and invite applications from interested academics in the field.
CONFERENCE CHAIRS & KEYNOTE SPEAKERS
Dr Joseph (José) McClanahan is an Associate Professor of Spanish and Associate Chair of the Department of Modern Languages and Literatures at Creighton University in Omaha, Nebraska. There, he teaches at all levels of the curriculum, including language and culture courses abroad. He has taught in both Latin America and in Spain. Recently, his research interests have focused on the area of teaching courses related to Languages for Special Purposes, in particular courses related to teaching Spanish to future Healthcare professionals. He also has a strong interest in curricular development and design that centers on new students entering the university. He has also led student educational trips to almost every continent on the globe.

Featured Presentation: Educating for the Future – How Undergraduate Research Can and Does Provide Opportunity for Students to Succeed

It is paramount that educators continue to adapt and develop new approaches that create equal opportunities for productive educational experiences for all students. One key way in which we can accomplish this goal is through collaborative research with undergraduate students. The sciences (biology, chemistry, or physics) have already had success in creating research programs for students. Yet, many outside of these traditional sciences may not fully grasp how they can incorporate students into their own research projects and what it means to work with undergraduates in their scholarship. Therefore, this presentation explores how faculty can include students in our research, help dissipate some of the commonly held myths about undergraduate students in research, and discover the benefits of this work for faculty and students.
Insung Jung has been a professor of Education at the International Christian University in Japan since 2003. Before joining ICU, she served as the Director of the Multimedia Education Institute at Ewha Womans University in Korea. She is co-author and co-editor of several publications including *Quality assurance and accreditation in distance education and e-learning: Models, policies and research* (Routledge), *Distance and blended learning in Asia* (Routledge), *Quality assurance in distance education and e-learning: Challenges and solutions from Asia* (Sage), *Online learner competencies: Knowledge, skills and attitudes for successful learning in online and blended settings* (Information Age Publishing), *Culture and online learning: Global perspectives and research* (Stylus), and *Liberal arts education and colleges in East Asia: Possibilities and challenges in the global age* (Springer). Currently, she is serving as an advisor to the International Board of Standards for Training, Performance and Instruction (ibstpi); a co-editors-in-chief of the International Journal of Educational Media and Technology, a regional editor of the *International Review of Research in Open and Distance Education* (Athabasca University, Canada); an associate editor of *International Journal of Distance Education Technologies* (USA); an editorial board member of *Distance Education* (Australia), *Asian Journal of Distance Education*, *Journal of Online Learning and Teaching* (USA), and the *Journal of Distance Learning* (New Zealand); a critical friend of *British Journal of Educational Technology* (UK), and a reviewer of several other journals including *Educational Technology Research & Development*, *Computers & Education*, and *Journal of Distance Learning*.  

**Keynote Presentation: MOOCs: What we have learned**

Massive open online courses or MOOCs were predicted to achieve world domination and completely transformation of higher education. Today, these predictions are seen to have been overblown. But with several years of experience now behind them, MOOC providers and users are adjusting both their perceptions about online learning and the courses themselves. This presentation will examine the ways MOOCs are being used by individual learners and university systems, and their impact on access, quality and cost in higher education. It will conclude with lessons learned and explore emerging issues and what next.

**ACSET 2016 Conference Chair Panel**

The Asian Conference on Society, Education & Technology 2016 invites educators and policy makers from around the world to look at the latest trends and issues in technology policy and practice and its role in the private and public sphere.

ACSET is a conference about change and transformation, and the conference theme of “Education and Social Justice: Educating for Equality within and across Borders” looks at how technology can transform and change systems and whole societies, whilst itself in a state of continuous transformation and change. Harnessed in the right way, technology can empower individuals to achieve great things and make the world a better place, but also raises many worrying ethical questions, including those concerning privacy and surveillance.

This panel will feature a discussion with Conference Chair Keith Miller and ACSET Keynote Speaker Insung Jung, facilitated by Professor Bethany Spielman.

Dr McCagg is the Vice President for Academic Affairs of Akita International University (AIU), where he also serves as a member of the board of trustees. In his current position, he provides leadership for the faculty, who strive to make the University the best destination in Japan for international students to learn about this country, its people and language, and for Japanese students to prepare to become the global leaders that the founding president envisioned when he established AIU in 2004.

Prior to AIU, Dr McCagg worked for New York University as Clinical Professor of English and Director of The American Language Institute. He also taught for many years at International Christian University (ICU), where he served in various administrative assignments including Dean of International Affairs.

For nearly forty years, Dr McCagg has dedicated his life to helping Japanese engage in responsible and meaningful ways with people from outside Japan, and to helping students from around the world successfully navigate life in Japan.

Featured Panel Presentation: International Liberal Arts – Meeting Japan’s Higher Education Needs in the Global and Digital Era

Scarcely into its second decade of existence, Akita International University (AIU) has become a model for how Japanese institutions of higher learning can better prepare students for making meaningful contributions to the wellbeing of the global community and the planet. When it comes to educational and social justice, to equality within and across borders, AIU aims to establish educational structures and incorporate learning activities that challenge not only students’ minds, but also their hearts—structures and activities designed to develop their capacity for understanding, caring about, and rising to the challenges of our complex times. In an age where human and digital networks define and facilitate ways of working together to address the world’s most pressing problems, AIU strives to use its global connections to link faculty and students with colleagues both locally and at a distance in face-to-face and digitally mediated intercultural project-based learning.

All this “aiming” and “designing” and “striving” may sound well and good, but this presentation angles less to promote AIU, than it seeks to reveal ways for all who share the lofty aspirations embodied in the conference’s 2016 theme to work toward their greater achievement. Through a critical analysis of AIU’s existing programs and curricular offerings, the speaker identifies dimensions of the university experience in Japan that can and need to be strengthened in order to create coherence and integrity in students’ intellectual experiences.
Dr Yvonne Masters is currently a Senior Lecturer in Professional Classroom Practice in the School of Education, University of New England (UNE), Armidale, Australia, a position that she accepted after five years as Director of Professional Experience in the same School. Prior to taking up her position at UNE Yvonne had 30 years’ experience in secondary schools including in the roles of Curriculum Coordinator, Deputy Principal and Principal, roles that developed her skills in leadership, project management, curriculum and assessment. Her teaching experience spans three Australian states. Yvonne’s research interests centre on teacher education, professional experience and virtual worlds, with a particular focus on distance education students. She has a keen interest in developing an understanding in pre-service teachers of the need for a caring and professional approach to teaching. Her goal is the development of teachers who respect their students and empower them in classrooms rather than dis-empowering them through punitive and unreasonable responses. Yvonne gained in 2010, in collaboration with other researchers, an Office of Learning and Teaching (OLT) grant entitled VirtualPRE: Innovative assessment using a 3D virtual world with pre-service teachers, and at the end of 2014 received an OLT Seed Grant to develop resources to equip pre-service teachers for the new wave of virtual schools. Yvonne has written and co-written seven book chapters, two journal articles and presented six refereed conference papers in the last three years. While Yvonne is an active researcher and a teacher educator, her deep passion is providing school students with an engaging classroom where each student is respected for their own individuality and provided with an environment that facilitates their learning.

**Spotlight Presentation: Quality or Elitism? Whither (or Wither) Equality in Teacher Education?**

Quality teachers are important. Accepting this as a given, there is ongoing debate about what ‘quality’ means and how it is achieved. In Australia, as elsewhere in the world, the debate continues and governments continue to promote a range of measures purportedly designed to improve quality. Such measures include higher entrance scores for university, aptitude tests, and literacy and numeracy entrance and exit tests. In the world of increasingly measureable accountability it is time to consider that numbers may not tell the whole story. ‘Equality’, and more importantly ‘equity’, transcend the borders of numerical accountability, recognising that students are not all the same, that they all have different needs and that they do not all begin from a level playing field. In Australian teacher education there is an impetus to stop the enrolment of a range of students who have pursued different pathways to teacher education including mature age students and early entry students. With the shift to enrolments based only on high entrance scores there is also a lack of equity for a range of other students whom research has shown to achieve at lower levels: rural students, non-English speaking background students, indigenous students and students with special needs. This paper examines the possible impact of the move to entrance score only acceptance into teacher education courses and draws on a range of examples demonstrating that equity in acceptance does not impede quality in the emerging teachers.

**Featured Presentation: ‘I have presented my research’: an ending or a beginning?**

Research is not a rarefied activity that only takes place in universities and/or laboratories, nor is it a one-off event. Presenting to others is not only for conferences, nor is it the end of a journey. Moving forward, whether to postgraduate work at a university or taking on a career, there is still an expectation that thoughts and ideas can be eloquently presented to others.

There is also an element of research in most occupations. This presentation explores possible beginnings for future consideration.
Grant Black
University of Tsukuba, Japan

Grant Black is an associate professor in the program for Modern Languages and Cultures, Faculty of Humanities and Social Sciences at the University of Tsukuba, an adjunct lecturer in the Faculty of Commerce at Chuo University, and a consultant for intercultural and business management. He has an MA in East Asian Languages and Cultures from the University of California, Los Angeles. He previously worked in international operations for small and medium-sized enterprises (SMEs) and in intercultural training. Currently, he is completing a doctoral research project with the Centre for Labour Market Studies, School of Management at the University of Leicester. His research interests are in youth-to-work transition, CQ (intercultural intelligence) and global management skills.

Fumiko Kurihara
Chuo University, Japan

Fumiko Kurihara is a Professor at the Faculty of Commerce, Chuo University. She received an MA in TESOL from Georgetown University, and a PhD in English Language Education from International Christian University. She has taught EFL (English as a foreign language), intercultural communication, linguistics, and SLA (second language acquisition) at various universities in Japan. Her current research interests are intercultural approach to language learning, global citizenship education, and CLIL (content and language integrated learning).
Reiko Yamada
Doshisha University, Japan

Reiko Yamada is Professor of Faculty of Social Studies and Director of Center for Higher Education and Student Research at Doshisha University, Kyoto, Japan. She has long been interested in the comparative higher education policy in OECD countries. More recently, she has conducted the quantitative study for student development and is engaged in the comparative student research between Japan, Korea and the United States. Dr. Yamada served as the Director of the Center for the Faculty of Development and Assistant Academic Provost at Doshisha University between 2013-2015. She serves as a member of the committee of the National University Corporation Evaluation Commission in Japan. She is the author of *For the Quality Assurance of Undergraduate Education* (Toshindo, 2012). She is also editor of *Comparative Analysis of Learning Assessment* (Toshindo, 2010). Her recent publications include *Measuring Quality of Undergraduate Education in Japan* (Ed. R. Yamada), (2014). She was the first president of Japanese Association of First Year Experience.

Higher Education on a global basis is now facing a great issue. These factors are associated with one common phenomenon exemplified as globalization and its impact. Serious competition as a result of globalization urges Japanese universities to transform themselves to cope with a knowledge-based society. Thus, transfer of knowledge and human personnel in a knowledge-based society is regarded as synonymous with internationalization. Japanese universities are obliged to deal with upgrading excellence in research as well as teaching and learning in more global context. However, not only Japan but also the rest of the world is struggling to adjust to global developments in higher education. This paper will analyze the government policy change of higher education in recent years and some case studies of higher education institutions. Many developments characterize global competition in higher education institutions in Japan, and I would like to focus on some of these developments, including (1) the internationalization of universities, such as development world campus plan in the framework of partnership with higher education institutions in other countries, (2) how Japanese universities have transformed their departments to adapt to challenges to the international movement. Then, the paper will show the case study of Doshisha University; how she has transformed in order to deal with the international movement. Although, the second focal point is more domestically analyzed and reflects the local environment in Japan, it will explore how the structure of departments of Japanese higher education was affected by the government policy direction.
Yasuo Nakatani
Hosei University, Japan

Yasuo Nakatani is a Professor of the Faculty of Economics at Hosei University. He received his PhD from the University of Birmingham and was a visiting scholar at Oxford University. His research interests are Second Language Acquisition, Academic Writing and Business Communication. He published a number of research articles regarding Communication Strategies in international Journals such as The Modern language Journal (MLJ). He is a coauthor of Language Learner Strategies: Thirty years of Research and Practice from Oxford University Press and has published several books such as Improving Oral Proficiency through Strategy Training, and Global Leadership: Case Studies of Business Leaders in Japan. He is a reviewer of MLJ, TESOL Quarterly, System, Language Learning and Journal of Pragmatics.

Featured Symposium Presentation: Global Education with Business-Academia Collaboration

An important goal of higher education is to research and write a decent thesis. To achieve this, learners should read substantial books to define significance of research territory, and develop critical thinking and problem solving skills. However, it is not easy to motivate them to complete demanding tasks merely at classrooms and libraries. This paper presents a unique example of global education at a seminar (GES), which helps students improve academic skills. GES enhances learner strategies by project-based learning (PBL) with business-academia collaboration. GES consists of three stages; role-model learning, overseas projects, and thesis writing. First, students meet with social leaders inspiring and encouraging them to strive for greatness, such as the Vice President of Coca-Cola Japan, and the ex-CEO of Toshiba Vietnam. When understating industries and preparing for Q & A sessions, students are supposed to read many books with critical thinking and find relevant research topics. Secondly, they take part in PBL by visiting Asian countries and investigating local operations of companies like Coca-Cola and Toshiba. They also visit foreign universities to discuss social issues, and conduct interviews and questionnaires with students there. After finishing the projects, they report findings and present new business ideas at company headquarters. Finally, having feedback from business executives on their projects, students start writing theses with the obtained data and propose new research niches. They use the academic writing textbook based on corpus analysis dealing with 200 academic papers. Through GES, students can develop strong motivation for continuing active learning.
Dr Maria Gabriela Schmidt is currently an Associate Professor of German as a Foreign Language at the Center for Education of Global Communication, University of Tsukuba (Japan). Born in Stuttgart, Germany, Dr Schmidt was educated at Mainz University (Germany) and graduated with an MA in Philosophy. Just after graduation, the first six years of her academic career started as an assistant lecturer for General and Comparative Linguistics at Mainz University, before going to teach German Philology at Dankook-University in Seoul (South-Korea) for 3 years. Continuing her linguistic research, she gained a PhD degree in Comparative Linguistics from Mainz University. She has 18 years teaching experience at university level for German as Foreign Language and Linguistics in Japan. Dr Schmidt’s research is focused on applied linguistics and teaching methodology. She is currently an active member in the Japanese Association of Language Teaching.

Featured Symposium Presentation: ‘Reaching out and turning halfway - Foreign language education policies and effects of the CEFR’

The attitude towards foreign language education in Japan concerning the Common European Framework of Reference (hereafter: CEFR) and other frameworks and standards at university levels can be used as an indicator for addressing the needs of the globalisation process. This contribution will exemplify this process using case studies of CEFR implementations on a scale of successful and not so successful approaches and implementations. The critical evaluation will be done in the field of foreign language teaching and the efforts to achieve a more communicative language teaching resulting in a visible outcome the so-called communicative skills. The analysis of several implementations will show immanent criteria which should be considered further in the ongoing discussion on globalisation in Japan at university level.
Dr. Yukiko Mishina is currently an Assistant Professor at the University of Tokyo and teaches in the ALESS Program in the Centre for Global Communication Strategies in Tokyo, Japan. She graduated with a BS, MS, and PhD in Chemistry from The University of Chicago in Chicago, Illinois, USA. Her scientific research interests include metalloproteins and optogenetics. She is also interested in English language education and global higher education and research.

**Featured Symposium Presentation: Globalization and the Japanese Liberal Arts Education System**

In the contemporary globalized age, universities face pressure on various levels, constantly catering to the needs of local students and adjusting to function as an elite-level international institution. To meet current demands, there has recently been an effort among universities to stress globally-focused endeavors, leading to an expansion of programs and centers at universities in Japan that offer an increased number of English language courses and international exchange opportunities. Implicit within this expansion is a larger aim of providing students with flexibility, sensitivity, and openness towards diverse cultural perspectives. Although these initiatives appeared more prominently with globalization efforts, they also resemble the more established framework of a liberal arts education. Drawing on my own liberal arts education in the US as well as my experiences in teaching English at the Centre for Global Communication Strategies at The University of Tokyo, the relationship between liberal arts education and globalization will be examined. Specifically, this paper will discuss some key differences in global outlook and globalization at the curriculum level; a greater emphasis placed upon English education in the Japanese context, compared to the scholarly and cultural aims of a US liberal arts education to develop broader general knowledge and intellectual capacities. This distinction indicates that the concept of globalization is itself not globalized; it is instead understood and practiced differently across geographical and institutional contexts. This observation highlights the need to establish mutual understandings about the meaning of globalization, given the current prominence of this term in university policy decision-making.
Dr Patrick Lo is currently serving as Associate Professor at the Faculty of Library, Information & Media Science, the University of Tsukuba in Japan. He earned his Doctor of Education from the University of Bristol (U.K.), and has a Master of Arts in Design Management from the Hong Kong Polytechnic University, a Master of Library & Information Science from McGill University (Canada), and a Bachelor of Fine Arts from Mount Allison University (Canada). He also took part in a one-year academic exchange at the University of Tübingen in Germany from 1990–91. He is efficient in Chinese (both Cantonese and Putonghua), English and German.

Dr Patrick Lo has presented about 100 research papers and project reports focusing on librarianship, humanities, and education at different local and international workgroup meetings, seminars, conferences, etc., including: Mainland China, Hong Kong, Austria, France, Germany, Italy, Japan, Korea, Turkey, United States, and Sweden, and at institutions including the Library of Congress (U.S.), Austrian National Library (Vienna), University of Vienna, National Library of France (Paris), National Institute of Informatics (Japan), Konrad-Zuse-Center for Information Technology (Berlin), etc.

His research interests and areas of specialty include: comparative studies in library and information science (LIS); art and design librarianship and information literacy.

**Featured Symposium Co-Presentation: Inside the World’s Major East Asian Collections - Conversations with the World’s Leading East Asian Librarians, Archivists, and Curators**

We examine the rise of the “LAM,” an acronym that stands for libraries, archives, and museums and in doing so, we profile leading experts — librarians, archivists, and museum curators — who specialize in East Asian collections from across the world. In examining the dynamically shifting role of the cultural institution in the context of managing information and collections, our research provides important themes offered by these cultural experts in understanding the necessary professional skills, knowledge, and personalities that are required for working in such environments of varying size, scope, and composition in LAMs.

Interviewing practicing librarians, archivists, and museum curators across the world who specialize in East Asian collections, Inside the World’s Major East Asian Collections examines the shifting role of the cultural institution in the context of managing information, cultural and knowledge exchanges, and collaboration on a global scale and ultimately challenges the notion of what constitutes “East Asia’s collections.”

These managers of East Asia collections not only refer to library, archive, and museum (LAM) professionals who are ethnically of East Asian descent, but also their North American and European colleagues, who have devoted their careers to safeguarding cultural heritage collections of immeasurable values that are housed in different world’s leading LAMs, located all over the globe. That is why we went on a journey to interview experts from Berlin State Library, Bavarian State Library, the British Library, the British Museum, the National Library of France, the Vatican Library, the National Library of Denmark, the National Archives of Japan, the National Taiwan Library – just to name a few.
Dickson Chiu
University of Hong Kong, Hong Kong

Dickson K.W. Chiu received the B.Sc. (Hons.) degree in Computer Studies from the University of Hong Kong in 1987. He received the M.Sc. (1994) and the PhD (2000) degrees in Computer Science from the Hong Kong University of Science and Technology (HKUST). He started his own computer company while studying part-time. He is now teaching at the University of Hong Kong and has also taught at several universities in Hong Kong. His research interest is in library and information management with a cross-disciplinary approach, involving workflows, software engineering, information technologies, management, security, and databases. The results have been widely published in around 200 papers in international journals and conference proceedings (most of them have been indexed by SCI, SCI-E, EI, and SSCI), including many practical master and undergraduate project results. He received a best paper award in the 37th Hawaii International Conference on System Sciences in 2004. He is the founding Editor-in-chief of the International Journal on Systems and Service-Oriented Engineering and the EAI Endorsed Transaction on e-Business. He also serves on the editorial boards of several international journals. He co-founded several international workshops and co-edited several journal special issues. He also served as a program committee member for over 100 international conferences and workshops. He is a Senior Member of both the ACM and the IEEE, and a life member of the Hong Kong Computer Society.

Bernard Montoneri is the co-founder of the IAFOR Journal of Education. He earned his PhD (African, Arab, and Asian Words; History, Languages, Literature) and his BA in Chinese from the University of Provence, Aix-Marseille I, France. He taught Literature (European, Children, American, and British) and languages (French, English, and Italian) at Providence University for 16 years. He is currently an Associate Professor at Tamkang University, French Department, Taiwan. Bernard has around 40 publications, including journal papers (including SSCI, SCI, and THCI), conference papers, and books and has obtained many teaching and research projects. His research interests include French literature, children literature, English writing, automated scoring systems, teaching and learning evaluation, data envelopment analysis, networking, and teaching methods. He is a reviewer for top academic journals such as Review of Educational Research (ranked #1 in Education), American Educational Research Journal, Teaching and Teacher Education, and European journal of Operational Research.

Spotlight Presentation: *Impact of Posting Teaching Content Online in a French Course for Beginners*

Nowadays, a growing number of instructors use information and communications technology (ICT) inside and outside the classroom to teach all kind of courses, including language courses. The instructor used a traditional way of teaching (lecturing, text-book, conversation, no technology in the classroom, no social network) during the first semester of academic year 2013-2014 (September-January) in a French course for beginners in a Taiwan public university. During the second semester (February-June 2014), the teacher added the use of multimedia and Facebook to teach to the same students. They joined a Facebook learning group, which they could access anytime during the second semester; they could notably post, view posts, like, and comment in French and sometimes English (no Chinese). This study analyzes data from the first and second semester to measure students’ learning progress and how the group might increase or not, their motivation and change in their behavior. Students were expected not only to improve their reading and writing skills, but to increase their knowledge of French culture.
Bethany Spielman, JD, PhD, MHA, is Professor of Medical Humanities in the School of Medicine and is cross-appointed in the School of Law. Her scholarly publications, which bridge bioethics and law, include two books and more than a hundred articles that have been cited by The New York Times, the Institute of Medicine, the Irish government and numerous scholars. She is Editor-in-Chief of the journal *Medicolegal and Bioethics* and is a contributor to the *Encyclopedia of Applied Ethics*. Her current research projects, in collaboration with Memorial Hospital’s Clinical Ethics Center, focus on racial bias in clinical ethics consultation and on repeat ethics consultations. Dr Spielman teaches the law and ethics of human subjects research; physicians and human rights; law, religion and health care; ethics in a short white coat, and the social responsibilities of scientists. She enjoys spending time with her husband and two sons, painting, yoga, chi walking, swimming, and the trails and visual and performing arts of Door County, WI.

Professor Briganti is currently Assistant Professor at Nagasaki University School of Medicine, Japan, where he teaches Public Health in the English Section and oversees three different international exchange programs. Previously, Professor Briganti worked for Michigan State University, USA, teaching academic writing to VIPP (Visiting International Professional Program) students from Libya, Saudi Arabia and Kuwait, among others. After graduating with a Bachelor’s degree in Political Science, International Relations, from James Madison College at Michigan State University, Professor Briganti was active in two citizens’ lobby groups, Clean Water Action and Citizens Action, where he was a fundraiser and crew leader responsible for educating citizens statewide concerning legislative actions on environmental and civil liberties issues. Professor Briganti returned to Japan five years ago after obtaining his Master’s degree.

His current interests are cross-cultural competence, social justice, international academic collaboration, and Content-Based Instruction. He has an abiding love of literature, learning, nature and progressive ideas.

**Spotlight Presentation:** *Minding the Gap – Confronting the Standardized Testing Mindset in Higher Education*

Teaching to the test has become standard practice in Japan. The uniformity of instruction that this approach requires, as well as the apparent fairness of everyone being judged by the same standard, fits well within the parameters of conformity and equality that are hallmarks of Japanese society. Learners raised on this system become very comfortable with rote memorization and test-taking strategies. Those who excel in this system are on track to join the professional classes as lawyers, business leaders, and doctors.

In practical medical training at university level, however, complex, interacting variables in individuals and in populations as a whole confound this approach. ‘Answers’ are not simply a matter of black and white, of simple memorization, but rather the product of evolving knowledge of specific, interconnected, phenomena. The stark limitations of the ‘standard’ approach to learning are revealed through the ‘gaps’ students exhibit in their lack of prior knowledge, or presupposed misinformation.

During this discussion I will present some of the ‘gaps’ that learners have revealed through their exposure to a variety of public health issues and some methods undertaken to broaden the critical thinking skills of learners.

‘Gaps’ in critical (scientific) methodology that will be touched on include: confirmation bias, cherry-picking studies, equating published study with scientific ‘truth’, and disinformation though cultural/national mythology.
Associate Professor Robyn Gibson is Associate Dean of Student Experience in the Faculty of Education and Social Work at the University of Sydney. A former primary teacher and art/craft specialist, Robyn currently lectures in Visual and Creative Arts Education in both the Bachelor of Education (Primary) and Master of Teaching (Primary) programmes. Her academic research – which utilises interdisciplinary methodologies such as arts-informed inquiry and art/o/graphy – concerns creativity and creative teaching, and art as research/ research as art, particularly the connection between clothes and memory. The latter resulted in the publication of *The Memory of Clothes* in 2015. Robyn is passionate about the central and critical role the Arts can play in lifelong learning.

**Spotlight Co-Presentation: How Do We Become Socially Just Beings Through the Arts?**

Australia has a long history of engagement with the Arts, from the original indigenous people of the land through to more recent refugees and asylum seekers crossing our borders. And while arts education is mandatory in all Australian states and territories, policies and practices remain contested. The introduction of an Australian National Curriculum in visual arts, music, drama, dance and media arts is an opportunity for all students to express and represent ideas and experiences whilst developing and displaying empathy for multiple viewpoints.

The Arts contribute to the development of confident and creative individuals, nurturing and challenging active and informed citizens. This presentation argues that the Arts have the power to transform and change. Arts education at its core helps to “define and determine ways in which social justice is perceived and acted out”. How we prepare our students as socially just beings through arts education is thus illustrated through examples of innovative artistic practices and ideologies currently taking place in educational contexts across Australia, including the Confined Hearts Project and the School Drama Program in conjunction with Sydney Theatre Company and the Sydney Story Factory.
Dr Marianne Hulsbosch is a Senior Lecturer in Visual Art & Design Education at the University of Sydney. She has extensive experience lecturing in visual arts, design, technology and textiles education at national and international levels. Dr Hulsbosch explored identity construction through sartorial means for her PhD in Creative Arts. She publishes widely and her most recent titles are: *Pointy Shoes and Pith Helmets* (2014), Leiden: Brill; *Art & Me: Senior Visual Arts Stage 6* (2014) and *Art & Me: Teacher Resource Package* (2014), Melbourne: Cambridge University Press. Dr Hulsbosch has extensive experience in developing curriculum support material for teachers in art-based learning and teaching. Her current research interest is in the development of visual literacy in multicultural contexts. In addition, she continues to exhibit in internationally acclaimed exhibitions that incorporate a wide range of processes, materials and contextual sites.

He was one of the founders of the Department of Psychology at Tarumanagara, as well as the Dean of Psychology, Vice Rector and Rector of the university. He graduated with a degree in psychology from the University of Indonesia, art therapy from Emporia State, US, family counselling from Notre Dame de Namur, US, and clinical hypnotherapy from Irvine, US. He has nationally published a number of books with a particular interest in educational psychology, and in music and art therapy – methods with which he treated survivors of the Indonesian tsunami on behalf of the International Red Cross and the United Nations. He is a board member and area chair of the International Council of Psychology, and a founder and board member of the Asian Psychology Association.

Spotlight Presentation: Using Storytelling to Teach Morality in Education

Other than playing activities, children tend to be interested in listening to stories. Many stories can be utilized to teach children to learn a number of moral principles. The story of Pinocchio, for example, teaches children to learn to not tell lies. The story of Puss in Boots teaches children to learn to accept sharing and not to become too demanding, besides teaches children to learn to nurture and care for life. Different versions of similar stories exist in various countries. However, recent society tends to publish more stories about war and heroism. Super heroes that represent powers are more attractive to the public, including children, adolescents and adults, than stories about patience and resilience. Films and computer games tend to emphasize the importance of power and authority rather than nurturance, caring and resilience. This presentation emphasizes the importance of the utilization of stories for children’s moral education as an approach to developing the personalities of the children of the future.
Whether we are looking at why we must change, or how education has changed or even how education will change, change affects all of us involved in language education in many ways. Administrators, teacher trainers, teachers, students: we all wear many hats and we all come face-to-face with change, sometimes on a daily basis. Positive change is about improvement: improving proficiency, improving lives, helping learners achieve their goals and dreams and ultimately, broadening horizons.

In our work as educators we are often asked to effect change – that we are change-makers can be seen in the new curriculums, new material, and even new techniques or methods that we develop. For those of us who conduct research, our research is often focused on finding “better” or more effective ways of teaching often measured in outcomes such as students entered with an average of X and improved to an average of Y. In such a case, improvement = change! But change is also an area of research as can be seen by looking at journals such as the Journal of Educational Change, Changes in Higher Education, Culture and Change, and Educational Research for Social Change, to mention four. It is a serious area of study, and one worth our attention.

The focus of the last journal mentioned above is worth looking at. Change is not only about test scores or proficiency going up. It is also about lasting change in one’s life, life choices, and looking beyond us as individuals, the society we live in. Social change and a focus on improving the societies we live in is another outcome of education. In recent years, there has been a focus on language and identity. And there has been an embrace of sociocultural theory and language development.

At the same time change for the sake of change is not a good reason for change. There is often a tension between the status quo (which is not always bad) and the desire to change. As invested members of our field, we need to be able to examine change, identifying and applying that which is appropriate and will further our goals while also having the wisdom and gumption to reject change that does not make sense. As Dewey said, “reforms which rest simply upon the enactment of law, or the threatening of certain penalties, or upon changes in mechanical or outward arrangements are transitory and futile.”

And so we welcome you to The European Conference on Education 2017, where we can examine change in ways that are important to each of us. What are its challenges, its complexities, and its constraints? It is electrifying to think about the wide-ranging conversations we will have as we consider how we can go about educating for change the world over.

The European Conference on Education
June 29 – July 2, 2017 | Brighton, England

“Educating for Change”
The vision of IAFOR grew out of the perceived need to fill a vacuum in the communication and exchange activities of the academic world. Its mission arose out of examining that space and investigating why it existed. The vacuum existed because of the lack of opportunity for serious and thoughtful exchange between academics, members of the global business community, and practitioners in the fields of human endeavor that linked these groups together. In the field of education, for example, we have academic theorists, educational managers (political decision-makers and organisational directors) and classroom teachers with their support staff in IT, library work, exchange programs, and specialist fields. But how often do they have the opportunity to interact?

Moving beyond one particular field, larger questions arise: what function should universities prioritise in the twenty-first century? What do businesses see as their contribution to social and global well-being? How can people on the ground, trying to implement improvements that will transform human life, best be supported? And perhaps above all, what are the agendas that will drive mechanisms to enable these groups to interact effectively?

One piece of distilled thought that came from early exchanges at one of our conferences was the recognition that some of the rhetoric of concern about the problems of developing nations was perhaps over-focused on the term “poverty” because it can be defined only in a relative way. “Hunger” was put forward as being more immediate and itself a contributory factor to poverty, rather than the other way round. One key to the hunger issue could be the provision of safe drinking water, or water for irrigation in some contexts, while flood management might be necessary elsewhere. These, in and by themselves become valuable only insofar as they help to relieve hunger in specific contexts.

IAFOR is affording opportunities that do not exist elsewhere. The base is Kansai, Japan’s great commercial and manufacturing hub, one symbol of the emerging Pacific economy that is already eclipsing the long dominant Atlantic zone. Our conferences present those taking part with three unique dimensions of experience. First of all, it encourages interdisciplinary activity to be expanded. Depending on the field, this can face varying degrees of difficulty, ranging from discouragement to downright prohibition. Those overly dependent on fixed academic structures often see lateral thinking as a threat. None of these negatives apply in IAFOR. Its purpose is to generate new approaches that cross any disciplinary lines. The principle employed is to let the imagination permit intuitive responses to questions. There are no panels of critics. There are simply people who want to listen and reflect. The model of academic work as potholing is replaced by the metaphor of mountaineering. While respecting the need for solid and well-founded academic work, we feel the need to go beyond it from time to time to discover fresh approaches to old questions.

Secondly, it facilitates the heightening of intercultural awareness. Again, we encourage innovation through cross-cultural perception. Cultural roots influence people in their attitudes more than most would realise or admit. The need to see and internalise insights gained from other viewpoints is met by a process of steady illumination.

Thirdly, it promotes the broadening of international exchange. We may live in a world, but in reality parochialism still holds sway. The collapse of the U.S.S.R and the break-up of Yugoslavia led to the re-establishment of numerous former countries. While this may be desirable for the peoples concerned, it merely adds to the world’s cultural confusion. Exchange leads to explanation and that helps the growth of intercultural awareness.

IAFOR makes all of these developments possible in one gathering. Our conferences are not a substitute for specialist conferences. We intend our events to be an alternative that functions as a balance or even a corrective to the extreme tendencies that can arise from more narrowly defined research parameters. In short, IAFOR is promoting and facilitating a new multifaceted approach to one of the core issues of our time, namely globalisation and its many forms of growth and expansion. Awareness of how it cuts across the worlds of business, and academia, along with its impact on societies and institutions is one of the driving forces that has given the organisation its momentum, and is making it a pioneer in this global age.

Dr Joseph Haldane
BA (Hons), PhD, F.R.S.A., F.R.A.S.
President, IAFOR
Joseph Haldane is the President and Chief Executive Officer of the International Academic Forum. He was Academic Director from IAFOR’s inception in 2009 until January 2011, and Executive Director from 2011 until late 2014, when he assumed his current role. He is responsible for devising strategy, setting policies, forging institutional partnerships, implementing projects, and overseeing the organisation’s business and academic operations, including research, publications and events.

Dr Haldane’s academic interests include politics and international affairs, literature and history, and he holds a PhD from the University of London in 19th century French Studies. He began his academic career in France, and from 2002-2005 held full-time faculty positions at the University of Paris XII (Paris-Est Créteil) and Sciences Po Paris, as well as visiting positions at both the French Press Institute in the University of Paris II (Université Panthéon-Assas), and the School of Journalism at Sciences Po Paris. Prior to founding IAFOR in 2009, Dr Haldane was an Associate Professor at Nagoya University of Commerce and Business in Japan, where he taught a range of language and culture courses at undergraduate level, and the MBA Ethics course in the graduate school.

Dr Haldane is now a Guest Professor at Osaka University’s School of International Public Policy (OSIPP), where he teaches on the postgraduate Global Governance Course. His current research concentrates on post-war and contemporary politics and International Relations especially in and between Japan, China and the USA.

From 2012-2014 Dr Haldane served as Treasurer of the American Chamber of Commerce in Japan (Chubu Region). He is a Director of the Tokyo-based clean water charity, Wine in Water, and a Trustee of the HOPE International Development Agency (Japan). In 2012 he was elected a Fellow of the Royal Asiatic Society, and in 2015 a Fellow of the Royal Society of Arts.

He is married with two children and lives in Nagoya, Japan.
The Executive Council of the IAFOR International Advisory Board

The IAB Executive Council is composed of distinguished academics, business executives, former and current government officials, and community leaders of international standing. Its role is to provide counsel and direction in the business and affairs of IAFOR, suggest and approve the areas of scholarly investigation, and safeguard the independence of the Forum’s work. International Directors of Program and Research Institute Directors are ex-officio members of the Executive Council of the International Advisory Board. Membership of the Executive Council of the International Advisory Board is by invitation only.

IAFOR Key Staff

Kiyoshi Mana – Director of International Operations
Kiyoshi is the International Director of Operations, responsible for overseeing the operations of the organisation, including IAFOR’s conferences in Asia, Europe, North America and the Middle East. An American of Japanese descent, Kiyoshi has long been fascinated by the country of his ancestors, studying both Japanese language and culture at San Francisco State.

Alexander Pratt – Director of Systems & Administration
A Civil Engineering graduate from the University of Nottingham, UK, Alex first came to Japan in 1997. Previous to joining IAFOR, in 2013, Alex held positions in education management, information services, and international relations. At IAFOR Alex helps oversee the general administration and operation of the organisation.

Thaddeus Pope – Director of Design, Media & Marketing
Born and raised in Brighton, UK, Thaddeus is an experienced commercial and editorial photographer with a B.A. in Photography from the London College of Communication, University of the Arts London. Thaddeus oversees IAFOR’s design and media output, as well as producing photo-essays, short documentaries and other visual content for the organisation’s publications, including THINK. He is also the Creative Director of the IAFOR Documentary Photography Award.

Clare Midgley – Publications Manager
Clare graduated with a BA in French and Italian from the University of Bristol before going on to study for an MPhil in Linguistics at the University of Cambridge. She spent several years working in Cambridge on the publications team of an online, open-access science journal publisher before relocating to the Kansai area of Japan. In her role as Publications Manager at IAFOR she is responsible for IAFOR’s peer-reviewed journals, as well as the IAFOR Vladimir Devdé Haiku Award. Clare is the Editor of IAFOR’s online magazine, THINK.

John Ananthan – Design & Technology Coordinator
Born and raised in northern Denmark in a multicultural family, John studied Computer Science at University College Nordjylland. At an early age he started his own IT company, worked for several third party companies and now has over 11 years of experience in website management and software development. Due to his Scandinavian background, John speaks Danish and can understand Norwegian and Swedish.

Shawn Mahler – Director of Events, Media & Production
Los Angeles native Shawn Mahler has a wealth of experience working on film, video, and theater productions in the United States and Japan. He holds a Bachelor of Arts in Film Theory and Production from the University of California, Irvine. Shawn has spent over ten years in Japan where he has worked with numerous industry professionals to develop television shows, movies, and theatrical productions.

Virpi Helena Yasuda – Senior Administrative Assistant
Virpi has a BBA degree in Modern Languages and Business Studies for Management Assistants from HAAGA-HELIA University of Applied Sciences, Finland. Her common passions for both Japan and languages brought her to Nagoya to study Japanese. Helena joined IAFOR soon after finishing her one and a half year Japanese language course at the Trident College of Languages and Hotel Studies.

Yumiko Horie – Events and Domestic Relations Manager
Yumiko Horie is responsible for conference management and developing IAFOR’s institutional partner relationships. An Ibaraki-born Japanese native, she started her career as a correspondent of a major Japanese newspaper, before returning to study, gaining an M.Sc. at the School of Oriental and African Studies, University of London, UK. She has since worked in the international non-profit sector for UN institutions and an NGO.

Mariko Oguri – Senior Administrative Assistant
Mariko was born and raised in Nagoya, Japan. She majored in American History and as an exchange student in the US she focused on Gender Perspective. She then worked at the international sales section at a company in Aichi. Mariko also has translated correspondence exchanged between Japan and the US and has worked as a Study Abroad Counsellor.

Darcey Barge – Events, Media & Communications Coordinator
Darcey was born and raised in Yakima, Washington. Graduating from Yakima Valley and Collins College with qualifications in animation and TV video production, she pursued a career in the media at KNDQ-TV. After moving to KNXV-TV in Phoenix she received two Emmy nominations for her technical directing work Technical Directing Under Breaking News.

Stephen Rudden – Systems & Administrative Coordinator
Originally from Leicester, UK, Stephen Rudden is an experienced network and systems engineer with a B.Sc. in Computing from the University of Westminster. Before joining IAFOR, in April 2015, Stephen was a network engineer for a global consumer electronics company.

Alexander Pratt – Director of Systems & Administration

IAFOR Journals

The International Academic Forum’s Journals conform to the highest academic standards of international peer review, and are published in accordance with the IAFOR publishing commitment to make all of our published materials available online.

How are journal Editors appointed?

Journal Editors are appointed by The International Academic Forum’s leadership, under the guidance of the International Advisory Board. The term of appointment is for one issue, to be renewed by mutual consent.

How do we ensure academic integrity?

Once appointed, the journal editor is free to appoint his or her own editorial team and advisory members. All papers published in the journal have been subjected to the rigorous and accepted processes of academic peer review. Neither Editors nor members of the editorial team are remunerated for their work. Authors will never be asked to contribute towards publication costs.

How are papers selected?

Journal Editors may accept papers through an open call, and proposed articles may be sent directly to the respective editors. A small number of papers from the associated Conference Proceedings may also be selected by the journal editor(s) for reworking and revising, subject to normal processes of review. It is expected that between five and ten percent of papers included in any given Conference Proceedings will be developed for inclusion in the associated conference journal.

How are IAFOR journals related to IAFOR conferences?

IAFOR’s journals reflect the interdisciplinary and international nature of our conferences and are organised thematically. Papers included in the associated Conference Proceedings may be considered for reworking by the Editor(s), and are then subjected to the same processes of peer review as papers submitted by other means.

IAFOR Media Presents

The Greatest Gift

A shared ambition for change, transformation and social justice was the catalyst for IAFOR Media and HOPE International Development Agency, Japan to document the lives and stories of the Indigenous Peoples of the Philippines and their struggle to achieve equity in education.

The Greatest Gift was made as part of a fundraising effort to create scholarships for the Pamulaan Center for Indigenous Peoples Education in Davao, Philippines. Hance Pugaless is a first year student at the Pamulaan Center and The Greatest Gift follows her story as we learn of the ambitions and challenges of the IP youth.

A full-length documentary which further expands upon the lives of the IPs and the Pamulaan Center is currently in production.

Friday, October 21, 11:45, Prokofiev
The IAFOR Keynotes Series is a collection of Keynote Presentations, or associated papers given at our conferences. Presented as a part of the open research archive, the Keynotes Series provides an example of the range and quality of speakers at IAFOR events. These keynotes are lightly reworked, and contain references, but are otherwise true to the original address. Many can also be seen in video format on our YouTube page. Whether you were present at the conference or not, the content from senior academics is a valuable source of information for research across a broad range of disciplines.

Special Series & Monographs

The International Academic Forum publishes a number of special monographs both in print and online. One such publication is the IAFOR Haiku Anthology, which features a selection of haiku from the annual IAFOR Vladimir Devidé Haiku Award. This year’s award was its most prolific yet, attracting nearly 700 submissions from 60 countries. iaforhaikuaward.org

THINK.IAFOR.ORG is IAFOR’s brand new online magazine, launched for 2016. THINK is an ambitious project conceived by academics, for academics, with the following objectives:

– To provide an international, far-reaching platform for the best research presented at IAFOR conferences

– To make original, high-quality, thought-provoking multimedia content freely accessible to a wide readership

– To facilitate the opportunity for academics to step outside of the traditional research publishing status quo – to get creative, explore different disciplines and to have their ideas heard, shared and discussed by a diverse, global audience

Content published on THINK spans a wide variety of disciplines and the format is varied, encompassing full research papers, long-form journalism, opinion pieces, creative writing, interviews, podcasts, video, photography and more. Current contributing authors include leading academics such as Professor A. Robert Lee, Professor Bill Ashcroft and Professor J.A.A. Stockwin.

Get involved by visiting the website, following us on Facebook and Twitter and signing up to our e-newsletter:
