IAFOR would like to thank its institutional academic and conference partners, as we create a global alliance... why not join us?

welcome to acss/acsee

Dear Delegates,

Welcome to the Fourth Annual Asian Conferences on the Social Sciences, the Third Asian Conference on Sustainability, Energy and the Environment, and to the vibrant city of Osaka, the International Academic Forum's conference home.

An IAFOR conference is an international, interdisciplinary, intercultural and inter-professional event that invites academics, practitioners, scholars and researchers from around the world to meet, network, share intellectual developments, explore challenges to dominant paradigms, and exchange ideas in a supportive environment.

The conference themes of this joint event, 'Society, Environment and Trust: Towards Sustainable Systems of Governance' (ACSS), and 'Sustainability, Society and the Environment: Searching for Synergies' (ACSEE), are important ones, and no doubt in part the reason that this conference has attracted more than 300 delegates from across the globe.

The programme for ACSS/ACSEE 2013 promises to be an exciting one, with thematic topics that address the central aim of the conference in different but complementary ways, including through papers that draw on empirical research, that develop theoretical and conceptual insights, and that engage with the sciences from varied research approaches. The conference will be enhanced through its wide variety of presenters, who will draw on their diverse experiences and knowledges, and on their academic, personal and geographical contexts, in a programme that promises stimulating and challenging discussion, and intellectual discovery.

IAFOR provides an international academic forum that encourages the development of collaborative links and connections between the researchers, academics, scholars and practitioners, and I strongly encourage your active and open-minded engagement with the conference over this long weekend together.

I look forward to meeting those of you who are new to IAFOR, and to seeing again those delegates who have attended previous conferences.

Dr Joseph Haldane Executive Director, IAFOR

Ramada Osaka Conference Map

The Conference Registration and Information Desk will be situated in the Kiku base room on the second floor of the hotel throughout the conference. If you have already paid online, or by bank transfer, you will be able to pick up your registration pack. This will include a tote bag, the conference programme, and your official certificate of attendance and receipt of payment. At this time you will also be given a name card, and lanyard.

For those wishing to pay on the day, please note that we will not be able to process credit cards.

Conference Welcome, Keynote & Featured Session: Friday 9:00-12:00

The plenary session will be held on Friday morning, with the event beginning at 9:00 in the Aoi Room on the second floor. Please arrive in good time if you wish to attend the session. There will be an interval after the keynote address and complimentary refreshments and snacks will be served.

The Friday Spotlight Presentation and Discussion will be held on Friday from 13:00-14:00 in the Aoi Room on the second floor. Please arrive in good time if you wish to attend the session.

Concurrent Speaker Sessions

Concurrent Sessions will run on Friday afternoon, and on Saturday and Sunday. They are generally organized into streams. Sessions include two, three or sometimes four presenters. Each presenter has thirty minutes including Q and A time. The session length reflects the number of presenters.

Presentations and Equipment

All rooms will be equipped with a MacBook computer pre-installed with PowerPoint, as well as a screen and an LCD projector. If you wish, you may directly link your own PC laptop, although we advise you to use the computer provided by plugging in your USB flash drive.

We recommend that you bring two copies of your presentation in the case that one fails, and suggest sending yourself the presentation by email as a third and final precaution.

Session Chairs

Session Chairs are expected to introduce themselves and other speakers (briefly), and ensure that the session begins and ends on time, and that the time is divided fairly between the presentations. Each presenter should have no less than 30 minutes in which to present his or her paper, and respond to any questions.

The session chair is asked to assume this timekeeping role, and to this end, a yellow and red colored timekeeping card is used as a visual cue for presenters, letting them know when they have 5 minutes remaining, and when they must stop.

Please follow the order in the programme, and if for any reason a presenter fails to show, please keep to the original timeslots as delegates use the programme to plan their attendance.

A Polite Request to All Participants

Participants are requested to arrive in a timely fashion for all addresses, whether to their own, or to those of other presenters. Presenters are reminded that the time slots should be divided fairly and equally between the number of presentations, and that they should not overrun.

We recommend that the 30 minutes presentation timeslot be divided as follows: 20 minutes for the paper and 10 minutes for Q and A.

Poster Sessions & Poster Requirements

The poster frames are B1 and so it is recommended that posters be no larger than B1 (707mm \times 1000mm/27.8 inches \times 39.4 inches). A1 (594mm \times 841mm/23.4 inches \times 39.4 inches) is also fine. If your poster is outsized, then we will be able to provide tape.

conference guide

There will be wireless Internet connection throughout the second and third floors and other public spaces in the hotel. However, this can be temperamental and we would suggest that you do not rely on live connection for your presentation, or have back up screen shots in the case of internet down

For your convenience, there will also be a limited number of computers in the Kiku base room.

Printing

There will be a printer behind the information desk in the base room, and we are able to offer a complimentary printing service of up to ten A4 sheets should you need this. Please be advised that printing may not be available in peak times.

Badges

When you check in, you will receive a conference package, which includes your name badge. Wearing your badge IS required for entrance to the sessions. If you lose your badge it can be replaced for a fee of JPY 5000. You must wear your badge at all times during the Conference.

If you are not wearing your badge, security will stop you and ask you to show your ID and evidence that you are registered. Those unable to show proof will be escorted from the Conference by security.

There are (4) colors of badges indicating the type of conference participant:

RED: Presenters and General Audience YELLOW: Keynote and Featured Speakers BLUE: Conference Exhibitors and Affiliates BLACK: IAFOR Staff & Board Members

What to Wear & Bring

Attendees generally wear business casual attire. You may want to bring along a light jacket or sweater, as the temperature in meeting rooms is often difficult to control.

Security

The Japanese police have been enforcing random passport and identification checks. If you do not have identification when stopped, the police will detain you. There may also be a financial penalty. For the enjoyment of all participants, inappropriate behavior will not be tolerated and violators will be removed from the premises. Do not leave personal items or conference bags unattended anywhere in the Ramada Osaka as this will be taken away by security.

Smoking

The Ramada has implemented a Clean Indoor Air Act; therefore, smoking is not permitted in any of the conference rooms or the ballroom. Please smoke only in designated areas. There is a smoking room on the second floor at the top of the escalators.

Photo/Recording Waiver

There will be photography, audio and video recording at the conference. By entering the event premises you give consent to the use of your photograph, likeness or video or audio recording in whole or in part without restriction or limitation for any educational, promotional, or any purpose for distribution.

Refreshment Breaks

Complimentary coffee, tea, and water is available throughout the day in the Kiku base room. Light snacks will be provided twice a day, for one hour periods in the middle of the morning and then again in the afternoon. All other meals, including lunch and dinner, can be purchased at any of the restaurants or convenience stores in and around the Ramada Osaka.

Meals & Drinks

As a conference registrant, if you booked through the conference site and if you are staying at the Ramada then the buffet breakfast is included in your room price. This is a good occasion to start the day and meet other delegates. You must book through the venue page of the website to enjoy this arrangement.

20% Off Food and Drink

Conference Delegates are entitled to a 20% discount at the Neuf-Neuf Dining and Café (breakfast, lunch and dinner), The Tenzan teppan-yaki (lunch and dinner), the Lampada Restaurant (lunch and dinner) and très très bon (lunch and dinner). Just show your badge to receive this discount.

CONFERENCE PROCEEDINGS

The Conference Proceedings are published on the IAFOR website (www.iafor.org), and can be freely accessed as part of the research archive.

All authors may have their full paper published in the online conference proceedings. Full text submission is due by July 1 2013 through the online system. The proceedings will be published on August 1 2013.

Authors will have pdf copies of their offprints emailed to them by the IAFOR office by the end of August 2013.

Conference Chair, Keynote & Featured Speakers

Stuart D. B. Picken IAFOR, Japan

Professor Picken is the Chairman of the IAFOR International Advisory Board. The author of a dozen books and over 130 articles and papers, he is considered one of the foremost scholars on Japan, China, and Globalization in East Asia.

As an academic, Professor Picken has devoted more than 30 years to scholarship in Japan, notably as a Professor of Philosophy at the International Christian University in Tokyo, where he specialized in ethics and Japanese thought, and as International Adviser to the High Priest of Tsubaki Grand Shrine (Mie prefecture). He has also served as a consultant to various businesses, including Jun Ashida Ltd., Mitsui Mining & Smelting Corp., Kobe Steel, and Japan Air

As Chairman of the IAB, Professor Picken is responsible for the academic affairs and direction of the organization. He is also responsible for the development of the IAFOR Research Institute.

Although now resident in Scotland, Professor Picken maintains his interests in Japan, as Chair of the Japan Society of Scotland, and through the IAFOR IAB. He is also the Chairman of the Academic Board of New College, Birmingham. He lives near Glasgow with his wife and two children.

Eric M. Uslaner University of Maryland, USA

Eric M. Uslaner is one of the world's leading academics in the field of trust, and in particular the role of trust in society and public life.

Professor Uslaner is professor of Government and Politics at the University of Maryland-College Park, where he has taught since 1975, He is also a Senior Research Scholar at the Center for American Politics and Law, at Southwest University of Political Science and Law, in Chongqing, China, and a Honorary Professor of Political Science, at Aarhus University (Denmark). Professor Uslaner received his B.A. from Brandeis University cum laude with Honors in Politics in 1968 and his M.A. (1970) and Ph.D. (1973) in Political Science from Indiana University.

Previous positions and scholarships include a Distinguished University Research Fellowship at the University of Maryland, a Fulbright Lectureship and Visiting Professorship, at the The Hebrew University in Jerusalem, Israel. Professor Uslaner also is a Fulbright Distinguished Chair in American Political Science at the School of Politics and International Relations at the Australian National University in Canberra. In 2011 he was named one of the top 100 Thought Leaders in Trustworthy Business Behavior by Trust Across America.

Professor Uslaner is a member of the International Advisory Board of the Institute for Social Change at the University of Manchester (UK) and the "Social Trust in Sweden" research project, Ersta Sköndal University College, Stockholm, Sweden. He is also affiliated with the Transnational Research Institute on Corruption (TRIC) at the Australian National University.

His current research focuses on why people trust each other, primarily in the United States but also across nations. His recent work challenges the argument that diversity drives down trust and altruistic deeds and contends rather, that it is segregation and the lack of diverse ties that leads people to be less trusting.

Keynote Speech: Segregation and Mistrust

Generalized trust is a value that leads to many positive outcomes for a society. It is faith in people who are likely to be different from yourself. Yet, several people, most notably Robert Putnam, argue that trust is lower when we are surrounded by people who are different from ourselves. This view is mistaken. Diversity is not the culprit. Instead, it is residential segregation—which isolates people from those who may be of a different background. Segregation is one of the key reasons why contact with people who are different from ourselves does not lead to greater trust: I show that diversity is a proxy for the minority share in a community and that: (1) segregation, especially in diverse communities, drives down trust more than diversity does; but (2) close personal ties in integrated diverse communities builds trust, but more so in the United States than in the United Kingdom, and more for majority white communities than for minorities. 9:15-10:15 In Canada and Australia, living in an integrated and diverse community and having friends of different backgrounds leads to increases in trust for whites, but not for minorities—while the opposite holds for Sweden. I trace this to different immigration regimes in the three countries. I also show, however, that the decision to live in an integrated community itself stems from high levels of trust. Finally, multiculturalism leads to lower levels of trust because it stresses in-group identity rather than a broader concept of one's community.

Thomas W. Simon Johns Hopkins University-Nanjing University, China

Professor Thomas W. Simon currently teaches for Johns Hopkins University's Chinese American Studies Program at Nanjing University, China. He holds a PhD in philosophy from Washington University and a JD in law from the University of Illinois. His books include: Ethnic Identity and Minority Protection: Designation, Discrimination, Brutalization; The Laws of Genocide: Prescriptions for a Just World; Law and Philosophy; Democracy and Social Injustice. He has taught at the American University of Sharjah (UAE), Illinois State University, and University of Florida. He received a Liberal Arts Fellowship from Harvard Law School. He helped to establish Miyazaki International College (Japan). He was appointed Scholar in Residence at the University of Northern Colorado. He has held visiting positions at University of Malaya, York University (England), and University of Ljubljana (Slovenia). He is currently researching Muslim minorities in China and is doing a project comparing the legal systems of China and the US.

Featured Speech: Future Governance and Disappearing Nations: Canaries in the Sustainability Mine?

A number of island nations (The Maldives, Kiribati, and Tuvalu) are disappearing. Their futures challenge the very notion of sovereignty, which, hitherto has depended on territoriality. What legal status should these nations have when they have lost their territory? How can they establish new territory? This paper examines the latest efforts to save these nations, particularly with regard to their future governing structures. The Maldives has proposed to purchase land in India; Kiribati has actually acquitted land on the Fiji Islands; and Tuvalu has established special economic status for its citizens in New Zealand.

First, we examine the prospects of extending the notion of political refuges, covered by various international conventions, to cover this new category of environmental refugees. We also evaluate the prospects of strengthening and extending the international duty to rescue individuals to a duty to rescue entire nations.

Second, we explore the idea of prospectively establishing environmental trusteeships (similar to the now defunct trusteeship system in the United Nations) within nations of certain regions. These could be models of environmentally sustainable areas, governed by principles of ecological democracy. The canaries used as warning signs could become bird (and human) sanctuaries.

John Regan Texas A&M University, USA

spotlight speaker

Emeritus Professor John Regan had an extensive career in teaching and administration, most recently serving as professor and dean of the College of Architecture at Texas A&M University, also serving as the University Campus Planner and Head of the Campus Planning Research Laboratory. During his forty-four years in higher education, he was the dean of colleges of architecture in three major universities – Texas A&M from 1998 to 2008; the College of Architecture, Design and Construction at his alma mater, Auburn University, from 1995-98; the School of Design at North Carolina State University, from the 1989/90 year - 1995; he was the founding dean of the School of Architecture at the University of Miami from 1984-90.

A member of 18 national accreditation teams for professional programs, Regan served as national president of the Association of Collegiate Schools of Architecture. Regan's research focuses on innovation, design education, methodology, and campus planning.

Spotlight Speech: Innovation Through Syntactic Manipulation

While our Conference topic "Sustaining the Future" promises a diversity of ideas, the one factor that will drive sustainability in any of the social science fields in the future is what has been called the "currency of the 21st century – innovation".

A clear understanding of the processes that produce innovative ideas, concepts, processes and products is essential in a wide range of our fields, whether anthropology, politics, education, or social welfare. Innovation Through Syntactic Manipulation outlines a specific strategy to develop innovative results, first explaining the basic components of this process followed by case study documentations of how this process of innovation has been used by authors, designers, painters, composers and filmmakers. Attendees will learn how to use this "innovation process" to develop new strategies and/or products in any field.

The innovation process depends on three questions: I) What role does "information" play in how we understand things; 2) How is the focus subject organized? 3) How can we make innovation happen? By utilizing an essential human characteristic - the desire and ability to "make sense" of any situation encountered – the process combines seemingly opposite characteristics into a single idea, guaranteeing innovative results.

Future innovation is based on successful past innovations. Case studies document how James Joyce, Richard Wagner, Picasso, Duchamp, and Magritte used the Syntactic Manipulation process. This process incorporates the linguistic theories of Charles Sanders Pierce and supports the improvement of social sciences advocated by Bent Flyvbjerg as outlined in Social Science: Applied Phronesis.

Joseph Wunderlich Elizabethtown College, USA

Mr. Joseph John Wunderlich is the designer of several hundred buildings throughout many virtual worlds in Minecraft, and has presented his work on several occasions in Dr. Wunderlich's courses.

In 2012 the United Nations UN-Habitat's Sustainable Urban Development Network partnered with sandbox-game developers of the social-networking block-by-block building software Minecraft to upgrade 300 public spaces worldwide by 2016 by joining professional designers with local inhabitants in virtual-world simulations. This work is similar to the authors' research since early 2011 where a Minecraft server and concurrent database server were configured for peaceful architectural development by players worldwide, and in five college engineering and architectural courses. Students build green homes, plant gardens, and raise livestock in green villages, or on a virtual college campus within environments containing simulated weather, terrains, biomes, and Al-enhanced animals. Student avatars interact to design. Social-media scrolls across the screen so everybody can be heard. Student homes have active & passive solar, thermal mass, natural daylighting, mitigation of cold northern winds, and an overall architectural esthetic. Students create gardens, livestock areas, piazza's, markets, parks, and a wellness center with indoor pool and activity rooms. Credit is given for using the software's electrical, mechanical, and logic design features. Selected students are invited to develop professional architectural drawings. LEED (Leadership in Energy and Environmental Design) concepts are incorporated throughout. Future goals included implementing these methods in new architectural studio courses and at universities abroad; helping extend the UN/Minecraft concept to developed countries; and merging this research with the author's research in robotics & machine intelligence including interactive environmental maps communicating with real-time robots. Long-term goals include on-line virtual-reality classrooms and laboratories with real-time language translation and lifelike avatars.

Ernie Ko National Taiwan University of Arts, Taiwan

spotlight speaker

Professor Ernie Ko teaches international relations at the National Taiwan University of Arts. He holds a graduate degree from George Washington University (US) and a doctoral degree in International Relations from National Chengchi University, Taiwan.

Professor Ko devotes his time to a leading anti-corruption NGO, Transparency International Taiwan (TI-Taiwan), where he is Vice Executive Director. Their role is to assist in promoting international cooperation on global anti-corruption issues. His publications include his book, Taiwan Development, and as well as various journal articles on Corruption and Service-Learning. Prior to his teaching career, Dr. Ko was a seasoned journalist based at the White House in Washington DC during the Clinton Administration.

Spotlight Speech: INGO's Development and Fission - A Case Study on Transparency International

Transparency International (TI) is one of the major leading NGOs in the current wave of global anti-corruption movement. Very little literature, however, has discussed the internal conflicts' impact on the global anti-corruption movement. Moreover, there is lack of academic publication so far on the systemic research of the conflicts, confrontation, and diffusion among TI's cofounders. These cofounders of a dozen senior elites mainly from developed countries are above 70 years old in average. While facing memory fading and physical decade for these seniors, there is an urgent call for immediate action to approach them and analyze the commonalities and differences among themselves so as to better understand the development of a model NGO in the auspice of global civil society.

This paper explores the operational style, accountability, and transparency of TI. Leadership style and policy outcome are closely related to affect the performance of global anti-corruption movement. Ideas alone without good governance cannot sustain lofty-minded transnational advocacy networks. Idea-confrontation may lead to personal argument, and foster an hostile seed, which may lead to exodus in the future. This is a satire to the coalition-building policy of TI since its foundation.

This paper applies process-tracing methodology to approach interviewees. This research author has been devoted to this project since 2007 by reviewing current literature and adding first-hand interview data and cross-references. Process-tracing enables a representative case to deconstruct and reconstruct the causal mechanism. This research through literature and in-depth interview in TI-Berlin Headquarters may present an innovative contribution to better understand global civil society.

His research interests span business, technology and public policy and he is the author of over 85 peer-reviewed papers in these and associated fields. Balancing industry with academic interests, Jerry also served as head of financial analysis for a Bay Area Fortune 500 company, and as CEO of an aviation firm. He has been Principal Investigator on more than twenty U.S. federal research grants. From 1976-2004, Professor Platt was on the faculty of the School of Business at San Francisco State University, and was named Dean in 2001. From 2004 he was Senecal Endowed Dean of the Business School at the University of Redlands, California, before holding concurrent professorships at Redlands and Akita International University, Japan from 2010 until 2012. As Vice-Chair of the IAFOR International Advisory Board, Professor Platt advises the organization on matters pertaining to IAFOR's development and strategy, as it faces the challenge of sustainable growth as both a regional and global organization.

Featured Speech: In Rankings We Trust? Cautionary Tales Regarding Who's #I

Rankings are much in vogue, at least judging from newspaper and website headlines. For example, following are a sample of headlines from the first ten days of May, 2013:

- I) "The World's 50 Best Restaurants Announced" (4hoteliers.com, May I)
- 2) "Norway is the Happiest Country in the World" (anewlifeinnorway.wordpress.com, May 3)
- 3) "Croatia Ranks 64th in 2013 World Press Freedom Index" (Dalje.com, May 4)
- 4) "Rhode Island #25 in 2013 Bicycle-Friendly State Rankings" (GoLocalProv.com, May 6)
- 5) "Finland is the Best Place in the World to be a Mom, U.S. Ranks 30th" (UPl.com, May 7)
- 6) "China Wants to End World Bank Business Rankings" (RT.com, May 7)
- 7) "Florida Ranks #2 for Best State to do Business in 2013" (spacecoastdaily.com, May 8)
- 8) "Deloitte Ranks 11th on DiversityInc's Top 50 Companies for Diversity" (3BLmedia.com, May 8)
- 9) "High School Hotness Tournament Ranks Girls' Looks, Sparks Outrage" (newsmax.com, May 8)
- 10) "Ranking Reveals World's Top Countries for Higher Education" (PRnewswire..com, May 9)
- 11) "Rwanda is Fifth-Best Place for Investment" (AllAfrica.com, May 9)
- 12) "Japan Ranks as Top Asian Country in Global Sustainability Index" (Exo-Business.com, May 9)
- 13) "Report Ranks Wisconsin No. 34 in Business Tax Burden" (gazettextra.com, May 10)

Interesting, perhaps. Trustworthy? Informative? Harmless? Not necessarily.

Each of these rankings involves the selection, measurement, and weighting of multiple attributes to arrive at entity indices and rankings. There are choices to be made at each stage, and some choices have stronger theoretical support than do others. Mass media tends to highlight the results but overlook underlying choices.

This paper demonstrates the folly of trusting reported rankings without considering the methodological choices that generated those results. Examples from published reports currently in circulation demonstrate that reported rankings sometimes are based on incoherent or incomplete measures, sometimes are biased beyond salvation, and usually are based on weighting schemes that are not reported, are biased, or at best are highly subjective.

IAFOR

The International Academic Forum Academic Vision and Mission

The vision of iafor grew out of the perceived need to fill a vacuum in the communication and exchange activities of the academic world. Its mission arose out of examining that space and investigating why it existed. The vacuum existed because of the lack of opportunity for serious and thoughtful exchange between academics, members of the global business community, and practitioners in the fields of human endeavor that linked these groups together. In the field of education, for example, we have academic theorists, educational mangers (political decision-makers and organizational directors) and classroom teachers with their support staff in IT, library work, exchange programs, and specialist fields. But how often do they have the opportunity to interact?

Moving beyond one particular field, larger questions arise. What function should universities prioritize in the 21st century? What do businesses see as their contribution to social and global wellbeing? How can people on the ground, trying to implement improvements that will transform human life, best be supported? And perhaps above all, what are the agendas that will drive mechanisms to enable these groups to interact effectively.

One piece of distilled thought that came from early exchanges at an iafor conference was the recognition that some of the rhetoric of concern about the problems of developing nations was perhaps over-focused on the term "poverty" because it can be defined only in a relative way. "Hunger" was put forward as being more immediate and itself a contributory factor to poverty, rather than the other way round. One key to the hunger issue could be the provision of safe drinking water, or water for irrigation in some contexts, while flood management might be necessary elsewhere. These, in and by themselves become valuable only insofar as they help to relieve hunger in specific contexts.

iafor is affording opportunities that do not exist elsewhere. The base is Osaka, Japan's great commercial and manufacturing hub, one symbol of the emerging Pacific economy that in time will eclipse the long dominant Atlantic zone. iafor conferences present those taking part with three unique dimensions of experience. First of all, it encourages interdisciplinary activity to be expanded. Depending on the field, this can face varying degrees of difficulty, ranging from discouragement to downright prohibition. Those overly dependent on fixed academic structures often see lateral thinking as a threat. None of these negatives apply in iafor. Its purpose is to generate new approaches that cross any disciplinary lines. The principle employed is to let the imagination permit intuitive responses to questions. There are no panels of critics. There are simply people who want to listen and reflect. The model of academic work as potholing is replaced by the metaphor of mountaineering. While respecting the need for solid and well-founded academic work, we feel the need to go beyond it from time to time to discover fresh approaches to old questions.

Secondly, it facilitates the heightening of intercultural awareness. Again, iafor encourages innovation through cross-cultural perception. Cultural roots influence people in their attitudes more than most would realize or admit. The need to see and internalize insights gained from other viewpoints is met by a process of steady illumination.

Thirdly, it promotes the broadening of international exchange. We may liven a globalized world, but in reality parochialism still holds sway. The collapse of the U.S.S.R and the break-up of Yugoslavia led to the re-establishment of numerous former countries. While this may be desirable for the peoples concerned, it merely adds to the world's cultural confusion. Exchange leads to explanation and that helps the growth of intercultural awareness.

iafor makes all of these developments possible in one gathering. An iafor conference is not a substitute for specialist conferences. It is intended to be an alternative that functions as a balance or even a corrective to the extreme tendencies that can arise from more narrowly defined research parameters. In short, iafor is promoting and facilitating a new multifaceted approach to one of the core issues of our time, namely globalization and its many forms of growth and expansion. Awareness of how it cuts across the worlds of business, and academia, along with its impact on societies and institutions is one of the driving forces that has given iafor its momentum and is making it a pioneer in this global age.

Rev. Professor Stuart DB Picken

Order of the Sacred Treasure (瑞宝中授章), M.A. (Hons), B.D., Ph.D., F.R.A.S. Chairman, Japan Society of Scotland
Chairman, IAFOR Advisory Board

Leadership

Chairman of the International Advisory Board

The Reverend Professor Stuart D. B. Picken, Order of the Sacred Treasure, M.A. (Hons), B.D., Ph.D. (Glasgow), F.R.A.S.

Professor Picken is the Chairman of the IAFOR International Advisory Board. The author of a dozen books and over 130 articles and papers, he is considered one of the foremost scholars on Japan, China, and Globalization in East Asia. As an academic, Professor Picken has devoted more than 30 years to scholarship in Japan, notably as a Professor of Philosophy at the International Christian University in Tokyo, where he specialized in ethics and Japanese thought, and as International Adviser to the High Priest of Tsubaki Grand Shrine (Mie prefecture). He has also served as a consultant to various businesses, including Jun Ashida Ltd., Mitsui Mining & Smelting Corp., Kobe Steel, and Japan Air Lines. In November 2008, the Government of Japan awarded Professor Picken the Order of the Sacred Treasure for his pioneering research, and outstanding contribution to the promotion of friendship and mutual understanding between Japan and the UK. The honour is normally reserved for Japanese citizens and is a mark of the utmost respect in which Professor Picken is held by the Japanese Government. More recently, in 2012 he was invited to London to attend a reception at the Japanese Embassy, hosted by Emperor Akihito and Empress Michiko as an expression of their gratitude towards Britons who had helped support Japan after the 2011 Tohoku earthquake and tsunami. Professor Picken helped organize fundraising efforts through both the Japan Society of Scotland, of which he is the chair, in the UK, and IAFOR in Japan. As Chairman of the IAFOR Research Institute. Although now resident in Scotland, Professor Picken maintains his interests in Japan, as Chair of the Japan Society of Scotland, and through the IAFOR IAB. He is also the Chairman of the Academic Board of New College, Birmingham. He lives near Glasgow with his wife and two children.

Vice-Chairman of the International Advisory Board Professor Jerry Platt, B.S. (Michigan State), MBA (Wayne State), MA, PhD (Ohio State), MS (Stanford)

Jerry Platt is Professor of Global Business at Akita International University, Japan and Professor Emeritus at San Francisco State University. Professor Platt holds a B.S. in Multidisciplinary Social Sciences from Michigan State University, an MBA from Wayne State University, an M.A. in Public Administration, and a Ph.D. in Public Policy and Management from the John Glenn School of Public Affairs at Ohio State University, and an M.S. Statistics Post-Doctoral Degree from Stanford University. His research interests span business, technology and public policy and he is the author of over 85 peer-reviewed papers in these and associated fields. Balancing industry with academic interests, Jerry also served as head of financial analysis for a Bay Area Fortune 500 company, and as CEO of an aviation firm. He has been Principal Investigator on more than twenty U.S. federal research grants. From 1976-2004, Professor Platt was on the faculty of the School of Business at San Francisco State University, and was named Dean in 2001. From 2004 he was Senecal Endowed Dean of the Business School at the University of Redlands, California, before holding concurrent professorships at Redlands and Akita International University, Japan from 2010 until 2012. As Vice-Chair of the IAFOR International Advisory Board, Professor Platt advises the organization on matters pertaining to IAFOR's development and strategy, as it faces the challenge of sustainable growth as both a regional and global organization.

Executive Director Dr Joseph Haldane, B.A., Ph.D. (London), F.R.A.S

Joseph Haldane is the Executive Director of the International Academic Forum. He was Academic Director from IAFOR's inception in 2009 until January 2011, when he assumed his current enlarged role. He is responsible for setting policies, forging institutional partnerships, implementing projects, and overseeing the research and publications of the organization, as well as maintaining responsibility for overseeing IAFOR's growing global operations. Joe's academic interests include politics and international affairs, literature, history, and the history of ideas, and he holds a PhD from the University of London in French Studies. He has taught at the University of Paris XII [2002-2004], at the French Press Institute in the University of Paris II - Pantheon-Assas [2003-2004] and was a full-time lecturer at Sciences Po in Paris, where he directed a postgraduate course on British Politics and Media in the School of Journalism [2004-2005]. In 2005 he moved to Japan, and immediately prior to this post was an Associate Professor at Nagoya University of Commerce and Business in both the undergraduate and graduate schools, teaching the Ethics course in the graduate school. He is a fellow of the Royal Asiatic Society.

Osaka Conference Organizing Committee Chair Professor Steve Cornwell, M.A. (Wake Forest), M.F.A. (Virginia Tech), M.A.T. (School for International Training), Ed.D. (Temple)

Steve Cornwell is Professor of English and Interdisciplinary Studies at Osaka Jogakuin University, and also teaches in the online portion of the MATESOL program for the New School in New York. He helped write and design several of the New School courses and has been involved with the program since its inception. He is involved with the Japan Association for Language Teaching (JALT) (an affiliate of IAFOR) severing on its National Board of Directors (Director of Program); his duties involve working with a volunteer team of 50+ to put on JALT's annual, international conference each fall. Most recently, since 2012 he has been the Committee Chair of Osaka Jogakuin University's Lifelong Learning Committee and is responsible for their evening extension program geared at alumni and community members. He is also the Vice-Chair of Osaka Jogakuin University's English Education Committee which is responsible for suggesting policy regarding English Education and also responsible for developing material for the integrated curriculum. This year he is serving as country coordinator for Teachers Helping Teachers' Bangladesh Team. Teachers Helping Teachers is a special interest group of JALT and has been working closely with the Bangladesh English Language Teaching Association (BELTA) for several years jointly putting on professional development events for English teachers in Bangladesh. An American who has made Osaka his home, Professor Cornwell first became involved with IAFOR as a featured speaker at the first ACE conference in 2009, and has gradually become more involved in the organization, and in his capacity of Local Conference Chair, now assists in the logistical and administrative side of every event. He advises extensively on academic matters too, with particular responsibility for overseeing and developing the programs of the ACLL/ACTC conference in Japan, and the ECLL/ECTC event in the UK.

The International Advisory Board (IAB)

The Board is composed of distinguished business executives, academics, former and current government officials, and community leaders (for a full list please see below). Publications

The IAFOR Publishing Committmen

All materials published by the International Academic Forum, including journals, proceedings, articles, and monographs can be accessed online through the website at no charge. IAFOR is in the process of constituting a large internet-based and searchable research archive, and is committed to ensuring that this repository is open to any researcher in any country, where there is internet connection, and to providing access to this corpus without charge in online format.

lournals

The International Academic Forum is in the process of constituting a series of IAFOR Journals, conforming to the highest academic standards. Journal Editors are appointed by the International Academic Forum, and are encouraged to develop independent journals of academic integrity, with articles subject to international processes of peer review.

A small number of papers from the associated IAFOR conference proceedings are selected by the journal editor(s) for reworking and revising subject to normal processes of review. It is expected that between 5 and 10 percent of papers included in any given conference proceedings will be developed for inclusion in the associated conference journal.

IAFOR's journals reflect the interdisciplinary and international nature of our conferences and are organized thematically. Editors may choose to issue one, two or even three volumes of a journal depending on the quality and range of submissions in the respective conference proceedings.

Keynotes

The IAFOR Keynotes series is a collection of keynote addresses, or associated papers given at our conferences.

Presented as a part of the open research archive, the keynotes series provide an example of the range and quality of speakers at IAFOR events. These keynotes are lightly reworked, and contain references, but are otherwise true to the original address. Many can also be seen in video format on our YouTube page.
